

## B-Lock

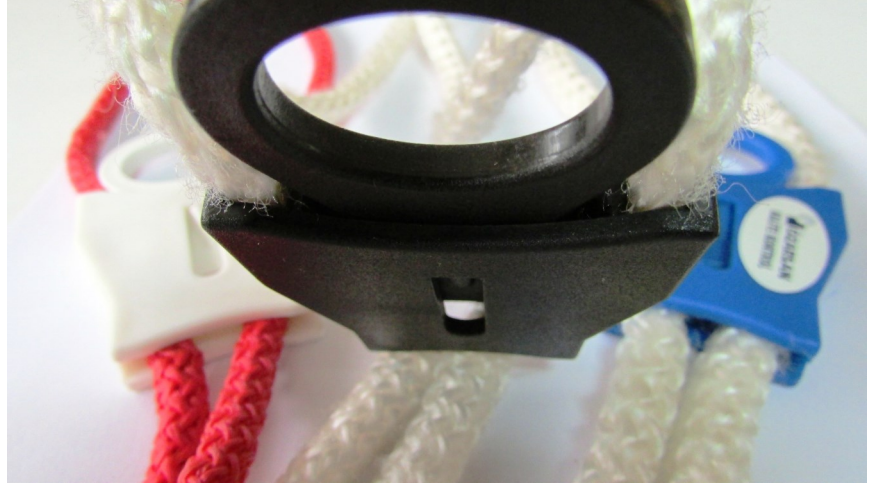

### TECHNICAL DATA SHEET

ÖZARSAN TMS CODE;

\*Black:BLPP983

\*White:BLPP984

\*Blue:BLPP985

An equipment used to fix and lock different components of an FIBC such as spouts, skirts, different type of closures preventing unexpected openings during handling operations. Also, it eases opening of mentioned accessories during discharging with a single pull from the O-ring. This is an operator friendly equipment reducing the risk of work accidents during discharging operations, due to the fact operators do not have to stand under a fully loaded FIBC when suspended over the hoppers. It producing by using %100 virgin PP, HDPE or PA following the requirements of the customers.

### Features:

#### Dimensions:

65mmx46mmx10,5mm

Weight : ~15Gram (Case and lock disc complete)

Material: PP,HDPE,PA

Color: Black,white,blue

Cord: to use 5-6-8mm

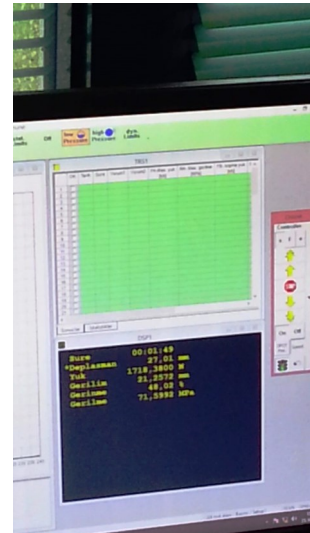

\*tensile strength test report 1630N

### Packaging:

P1) PP Bags 500pcs.  
~7,5Kg

P2) carton box 500pcs.  
30x30x30cm ,~7,5Kg

tensile strength tests done periodically
